## Energy

...whether oil by the barrel or gas prices at the pumps, or even the taxing of solar panels on our homes, continues to be of concern to all. The prestigious Stanford University, through their Solutions Project, has evaluated the wind, water and solar potential for 140 countries around the world, providing data on the costs and benefits for each nation. Included in their report are suggestions, with one even calculating precisely how Canada can move away from fossil fuels, transitioning to a totally clean-energy future through existing technologies.

"KNOWLEDGE IS POWER. INFORMATION IS  
LIBERATING. EDUCATION IS THE PREMISE  
OF PROGRESS, IN EVERY SOCIETY, IN  
EVERY FAMILY." - KOFI ANNAN

## Wealth

...is important, especially these days where money is still an unnatural motivator for too many. But that has lead to the rich become richer while the middle-class is decimated. It is a story that has been repeating itself for too long. It is time to change that. It is time that anyone with a little entrepreneurial spirit be allowed to start up their own endeavours to make them rich. Families CAN pull themselves from the muck of poverty and became powers unto themselves, able to determine their own futures, instead of being the puppets of others. Contact **S.E.I** for available freedom venues.

## GVM

The *Starlight Educational Institute's*

**Global Village Mindset** is a way of thinking and behaving that enables concerned citizens to facilitate their journey towards a better life by joining with like-minded Global Citizens. It is also a set of tools, training, relationships and venues that allow members to achieve their goals relating to a better life in a humane environment.

People think that wealth leads to happiness. Since in some situations that is true, most think that greater wealth leads to greater happiness. Others think that because they are wealthy they are smarter than the rest, that they are the successful ones. And of course some think that because they are wealthy they should be the ones to lead us. But true wealth, and power, comes from seeing the interconnections between all things, between all beings, so as to increase a being's ability to make ethical and wise decisions. The more holistic a being's knowledge becomes, the more ethical and moral that being becomes.

So it is imperative that we change our thinking.

William Blake said it very well: *The man who never alters his opinion becomes like standing water, and breeds reptiles of the mind.*

## Wealth

"*Caeium non animum mutant qui trans mare currunt*", which translated from Latin is "Those who hurry across the sea to change the sky upon themselves forget to change their state of mind and soul."

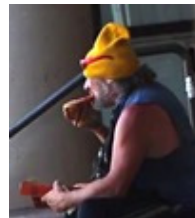

The morale is that just because we rush forward chasing wealth, we should still join with other in a GVM attitude and with humble souls so as to make our lives better not just for ourselves but also for future generations.

SEI President C. Hill

As a research institute, **SEI** must always seek out fresh "content". To do this economically, and unbiasedly, we need your help as contributor "grunters".
